

Best Doctors®

Wouldn't it be convenient if all medical records could be stored in one easy-to-access place?

Medical Records eSummarySM

Medical records collected and stored on a USB flash drive.

Best Doctors collects up to three years of a member's medical history and conveniently stores it on a USB flash drive that the member can take anywhere.¹ A medical expert will also review the member's records and provide a Health Alert Summary, bringing any potential health concerns to the member's attention.

Benefits of this Service

Convenience - Best Doctors does all the legwork by collecting medical records and delivering them to members in one easy-to-access place.

Inclusive - Medical Records eSummary covers family members, including spouses, partners, and children.

Additional Guidance - Best Doctors will review a member's collected medical records and offer guidance on health issues via a Health Alert Summary.

Up to **3 Years** of a Member's Medical History

*It was so convenient
having all my medical
records in one place.*

– **Katrina**

How it works

The member first calls or emails Best Doctors.

We will contact them to obtain a detailed medical history.

Best Doctors contacts the member's treating physician(s), hospital(s), and other medical facilities where they may have received care to collect their medical records.

All records are organized and stored on a USB flash drive. A Best Doctors physician reviews the records and provides a Health Alert Summary, informing the member of potential health problems which may arise in the future.

A secure flash drive containing the medical records and Health Alert Summary is shipped to the member via a secure and trackable method.

¹ A member is entitled to access the Medical Records eSummary service once per year.

Best Doctors helps members take control of their health and make medical decisions with confidence, improving the quality of care while helping to control costs.
